TECHNICAL SKILLS

Languages
JavaScript, Python

Backend
Node.js, Express.js, REST APIs, JWT Authentication

Databases
MongoDB, PostgreSQL

Tools
Git, GitHub, Postman, Docker, VS Code

Fundamentals
Data Structures & Algorithms, OOP, DBMS, Computer Networks

EDUCATION

Teegala Ram Reddy Group of Institutions
B.Tech, Computer Science and Engineering
Expected Graduation: 2028

INTERESTS

- Backend Engineering
- Application Security
- API Security
- Secure Software Development

P. PRUTHVI RAJ

Backend Developer | Computer Science Undergraduate

PROFESSIONAL SUMMARY

B.Tech CSE undergraduate focused on secure backend development with Node.js, Express.js, and REST APIs. Built a JWT-secured travel booking app with account lockout, a healthcare booking platform, a cafe ordering system, and an encrypted file storage service. Interested in application and API security.

PROJECTS

SecureVault | Secure File Storage Platform
Node.js · Express.js · MongoDB · AES-256

- Built backend authentication and file upload REST APIs.
- Implemented AES encryption for stored files, saving each file's initialization vector (IV) with its encrypted data.
- Currently implementing access control, audit logging, and client-side encryption.

JourneyVista | Travel Package Booking App
Flutter · Flask · PostgreSQL · JWT Authentication

- Built a mobile app where customers browse travel packages and book trips with a travel date and traveler count.
- Implemented JWT authentication with role-based access (customer/admin), input validation, password hashing, and account lockout after 5 failed login attempts.
- Developed REST APIs for registration, login, packages, bookings, and booking history.
- Built an admin panel with a dashboard, package and booking management, and user block/unblock/delete controls.

Prescripto | Healthcare Appointment & Medicine Booking
React · Node.js · Express.js · MongoDB

- Built a full-stack platform where patients book doctor appointments and order medicines online.
- Developed an admin panel to manage doctors, appointments, and medicine orders.
- Deployed the application live.

BrewHub | Cafe Ordering Platform
React · Node.js · Express.js · MongoDB · Socket.io

- Built an ordering platform with menu browsing by category, cart, checkout with special instructions, and order tracking.
- Implemented email/password authentication, profile management, and order history.
- Developed an admin dashboard for menu management and order status updates, with live notifications for new orders.

HACKATHONS & TECHNICAL EVENTS

Participated in Smart India Hackathon (SIH) and hackathons hosted by CMR College of Engineering and Technology, Vignan University, Mohan Babu University, and Global University.
